

## Multi Year Management Plan

The Village of Frankfort has developed a multi year management plan to maintain the current landscape quality and provide future enhancements to the Route 30 corridor.

- Perennials & Grass Maintenance
- Parkway Maintenance
- Mulch Bed Maintenance
- Fertilizer & Weed Control
- Landscape Improvements (as required)

## Route 30 Landscape Maintenance

VILLAGE OF  
**FRANKFORT**  
EST • 1855

## Route 30 Overview

As part of the Route 30 reconstruction and expansion that concluded in 2013, the Village of Frankfort required enhanced median and parkway landscaping along the corridor between Harlem Avenue and Wolf Road. In exchange for the enhancements funded by the state, Frankfort agreed to manage the maintenance of portions of the landscaping permanently.

After the landscaping warranty work by IDOT expired, the Village of Frankfort Public Works

staff was tasked with the oversight and maintenance of the Route 30 corridor.

This maintenance is shared by property owners & the Village and includes grass

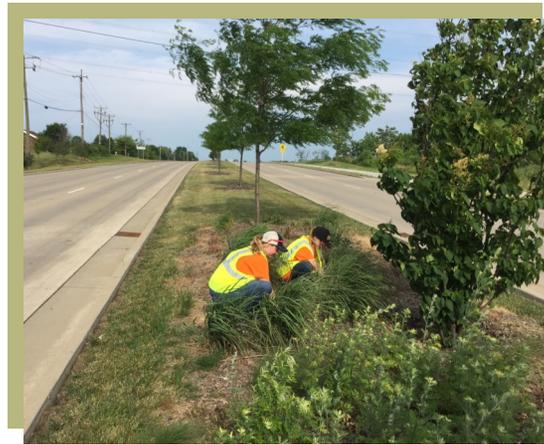

cutting, weed treatment/pulling, mulching & bed maintenance, damaged/dead plant material replacement, vehicle damage & reporting street signage repair to IDOT.

The Village has a multi-year plan for Route 30 landscape maintenance to ensure the high quality standards of the Frankfort community continue for years to come.

## Route 30 Landscaping Maintenance

### *Village Responsibility*

The Village of Frankfort maintains the medians (the landscaped area in the center of the road) from Wolf Road to Harlem Avenue. These medians are under the control of the Village and are maintained by the Village.

Maintenance includes mowing, mulch bed maintenance, plant maintenance, fertilizer and weed control. Plants are replaced as necessary.

## Route 30 Landscaping Maintenance

### *Business, Homeowner & Homeowner Association Responsibility*

There are areas along Route 30 that are not maintained by the Village of Frankfort. These areas are located in front of businesses, homes and homeowner associations along Route 30.

These property owners should be maintaining the parkway (**the area from the curb to their property**) along this route. This maintenance includes mowing, fertilizer, and basic weeding.

If a motor vehicle damages a parkway area, the Village of Frankfort will make the necessary repairs to the landscaped areas.
